- New finish coating available on all SARGENT product lines, utilizes a silver-based antimicrobial compound from AgION Technologies
- As an integral part of the finish coating, SARGuard lasts for the life of the hardware
- SARGuard coating permanently suppresses the growth of bacteria, algae, fungus, mold and mildew. It is effective against a broad spectrum of bacteria.
- Non-toxic and completely safe. The Agion antimicrobial compound is EPA and NSF approved and FDA listed for use in medical and food preparation equipment.
- Applications: Anywhere there is need for a clean environment (hospitals, laboratories, schools, medical centers, daycare, food processing etc.)

The AgION antimicrobial is not intended as a substitute for good hygiene. Coated products must still be cleaned to insure the surfaces will be free of destructive microbes. SARGENT makes no representations or warranties, express or implied, as to the efficacy of the AgION antimicrobial. A copy of the AgION warranty is available upon request.

8200 Mortise Locks Freewheeling Trim Design – FE ADA and Handicap Warning

SARGENT

www.sargentlock.com

8225 FEL shown

Maximum projection varies by lever design
Largest projection is "A" lever – 3-9/16" (90mm)

Features

The Freewheeling Mortise Trim is designed for areas that are susceptible to vandalism, including schools, universities, public buildings, back doors of businesses and any exterior doors where excessive or abusive force might be applied to the lever handle trim.

This design allows the outside lever handle to swing freely, down to 70°, in the "locked" mode. This eliminates resetting the trim after vandalism attempts because the lever automatically returns to its original position.

- For 1-3/4" (44mm) doors standard. For 2" (51mm) and 2-1/4" (57mm) thick doors, must specify door thickness on order.
- Vandal resistant trim
- Meets or exceeds ANSI A156.13 Series 1000 Grade 1 Operational and Security. Removable and SFIC cylinders do not meet Security Grade 1.

- Forged brass outside escutcheon trim provides added protection against vandalism
- Stainless steel lever bushing protects against wear
- Stainless steel lugs and thru-bolted trim design for proper alignment and increased security
- Retrofits 8200 mortise lock with same function, excluding 8205, 8216 and 8236 functions. These three functions can be achieved by functions 8285, 8286 and 8287 respectively.
- Functions available – 04, 05(as 85), 16(as 86), 17, 24, 25, 26, 31, 35, 36(as 87), 37, 38, 39, 40, *50, 65, 66, 85, 86, 87, 71, 73
- Levers A, B, E, F, J, L, P, W available

- Lever designs J, L and P have lever returns within 1/2" (13mm) or less of door and meet ADA Compliance for national codes
- Cylinder will protrude from escutcheon face on double cylinder functions only
- Cylinder sizes #46 outside, #41 inside standard on 1-3/4" (44mm) doors
- Specify hand, easily field rehanded

7800 Push/Pull Trim – PT

The Push/Pull design known for its ease of operation, is coupled with the strength and integrity of a mortise lock to provide greater versatility. The trim, commonly used in hospitals and health care facilities, can now service conference rooms, handicapped restrooms, laboratories and pharmaceutical facilities that require more durability and security features than a cylindrical lock can provide.

*Consult factory on instructions to modify existing lockbodies.
